National TVET Excellence Awards 2026

Scoring system: how everything works (short guide)

What it is

A web app where the judging panel scores every nominee against the same six criteria, with written reasons. Scores go straight into one Google Sheet owned by the organisers, so there is a single record and nothing is stored on anyone's device. The page runs from Vercel, a Google Apps Script checks who is asking and decides what they may see, and the Google Sheet holds the data.

Who uses it

Role	Signs in with	Can do
Judge	Name (from a drop-down) and personal 4-digit code	See nominees and nomination details (not contact details or the nominator), declare a conflict, score with written reasons, change their own scores with a reason.
Auditor (Legal Services, Internal Audit)	Name (from a drop-down) and personal code	Read-only: ranked results, every judge's scores and reasons, change log, declarations, moderation reports. Cannot score or edit.
Administrator	Admin PIN	Everything: nominees, judges, settings, results, moderation reports, clearing test data.
Visitor	Nothing	Sees only the number of nominees.

How scoring works

- Six criteria, each scored 1 to 5 (whole numbers): Teaching Effectiveness 25%, Student Performance 20%, Industry Alignment and WIL 20%, Innovation and Digital Teaching 15%, Professional Development 10%, Student Feedback 10%.
- Each score is weighted into a total out of 100. Three judges are required per nominee. The panel average sets the outcome: 90+ National Excellence Winner, 80 to 89 Finalist, 70 to 79 Merit, below 70 does not qualify.
- A written reason is required for every criterion. A submitted score can be changed only with a reason, and the old and new totals are logged.
- A judge with a conflict of interest recuses; their score for that nominee is removed and they do not count towards the three.
- Results flag "Awaiting judges" until enough judges have scored, and "Wide spread" when judges' totals differ by 15 points or more.

Built in from the Adjudicator Handbook

- **Rubrics on the scoring form:** under each criterion the judge sees what their chosen score means, a "what to look for" panel with guiding questions, and the cross-cutting indicators.
- **Declarations recorded:** each judge accepts the confidentiality declaration once, and ticks an impartiality sign-off on every submission. Each is saved with a server timestamp.
- **Final moderation report:** the administrator records strengths, evidence, achievements and a recommended outcome per nominee. Auditors can read it. A recommendation that differs from the score-based outcome is flagged.
- **Help page:** the five adjudication stages and the evidence review guide.

Privacy and security

- The nominee list is private: it is sent only to a valid judge, a valid auditor or the admin. The server enforces this, not just the page.
- 10 wrong codes for a name lock that name for 15 minutes. Every write action is checked on the server; auditors cannot write at all.
- Contact details and the nominator are hidden from judges. Anyone with Editor access to the Google Sheet can see the PIN and all codes, so the sheet is not shared with judges.

Refreshing

The page is a snapshot of the sheet. It re-reads after every sign-in and save, has a Refresh button, and updates itself every 2 minutes on the Dashboard and Results pages only. It never refreshes the Scoring page, so a judge's work in progress is never wiped. Other people's changes can take up to 2 minutes to appear unless Refresh is pressed.

Quick admin actions

- **Judges:** edit the judge list in Settings, then run **setupCodes** in the script editor to issue codes and clear lockouts.
- **Auditors:** add or change them in the Auditors tab of the sheet (Name, Code). No redeploy needed.
- **After any script change:** Deploy, Manage deployments, pencil, New version, Deploy. If the address changes, update SHEET_URL in the repo.

Open points

- Should auditors be able to mark a shortlist (handbook Stage 3), or stay read-only?
- Confirm the app's judges are the Stage 2 "DHET Scoring Team", and that the panel chair's verification can be covered by the admin PIN.
- Some nominee rows still need organiser decisions, and one phone number needs checking.
